

High Performance, High Function System Drive  
**SOFTSTARTER SS7**

2.2kW ~ 1.5MW / 230 ~ 690V

Drive Solution

## Optimized Solution for high performance drive 2.2kW - 1.5MW / 230 - 690V

### Optimized motor control solution

#### Serial Communications

SS7 is available with in-built RS232/485 serial ports, developed for integration into the most commonly used industrial communication protocols. While MODBUS protocol is standard, other protocols are supported including PROFIBUS-DP, DeviceNet.

#### Slow Speed

SS7 Series allows torque adjustment at slow speed, thus it will adapt to any type of load requirement. This setting is ideal for machine positioning, as ceramic mills, etc.

#### Dynamic Torque Control

SS7 Series are featured with Dynamic Torque Control, exclusive starting method, it means progressive soft starting in those high inertia applications. With this control algorithm, progressive acceleration and optimization of starting current peak is achieved.

#### D.C. Brake

In some applications the deceleration ramp is not enough. DC Injection setting is provided in SS7 Series for those, specially in high load inertia machines.

#### Pump Control

An special designed control algorithm for decelerating pumps is provided in SS7 Series. This special adjustment does not operate in function of lineal stop curve for quadratic torque loads, as it is normally operated, but automatically it will adapt to hydraulic system curve.

### External or Built in Bypass

SS7 softstarter offers both possibilities. The user can choose the standard model offering the possibility of installing an external contactor for bridging the power stage once acceleration ramp is finished, until the start of deceleration ramp. Otherwise the user can choose the new SS7 model with built in bypass which will offer the same functionality without requiring any external device installation. In any case, SS7 control stage remains monitoring all control operations and motor protections.

### Permanent Information

SS7 Series displays constantly, motor status and complete information of the installation where it is integrated. The user will access locally (keypad unit) or remote (serial communications) to the following information :

- Voltage in each phase
- Total and partial
- Motor phi cosine (Power Factor)
- Motor shaft torque
- Power (kW) and current (I) in each phase
- Fault history (5 most recent faults)
- Number of starts
- Analogue input / output status
- Digital input /output status
- Timer, total and partial

### Integration and Control

SS7 Series make easy its integration into any automation process. Via 2 analogue inputs 0-10V and 4-20mA, 5 configurable digital inputs, 1 PTC input, 1 analogue output 4-20mA and 3 changeover configurable relays.

### Full Protections

All protections included in SS7 Series are translated to a better control and motor security.

- Input phase loss
- Rotor locked
- Phase imbalance > 40%
- High input voltage
- Low input voltage
- Motor overload
- Motor underload
- Motor overtemperature PTC
- Shearpin current
- Input phase sequence

### Multivoltage

Only one softstarter for 230V/400V/440V and 500V, simply adjusting SS7 current to motor's. For 690V, please consult tables available at standard ratings section.

### International Standards

SS7 complies with international standards as CE, cTick, UL and cUL

## Technical Specifications

Input	Input voltage	3 Phase, 230-500V, 690V (-20%~+15%)
	Supply frequency	47-62Hz
	Control voltage	220-230V (± 10%)
Output	Output voltage	0-100% Supply voltage
	Output frequency	47-62Hz
	Efficiency (at full load)	> 99%
Environmental Conditions	Ambient temperature	-10°C ~ +45 °C
	Altitude losses	Below 3,000m <sup>*note 1</sup>
	Ambient humidity	Less 95% (non-condensing)
	Enclosure	IP20
Serial Communications	Standard	RS232/485, Modbus
	Option	Profibus, DeviceNet
Motor Protections	Input phase missing, High current, Low input voltage, Starting current limit, Rotor locked, Motor overload (thermal model), Underload, Phase unbalance, Motor overtemperature (PTC, normal status 150R-2k7), Shearpin current	
Protections	Thyristor fault, SS7 over temperature	
Sources Control	Local via keypad, Remote via digital inputs, Remote via Serial Communications (Modbus, RS232/485)	

\*note 1) More 1,000m, 1% derating each 100m

Adjustments <sup>*note 2</sup>	Torque surge, Initial torque, Initial torque time, Acceleration time, Current limit : 1-In, Overload : 0.8-1.2 In, Overload slope : 0-10, Deceleration time / Freewheel stop, DC braking, Slow Speed (1/7 fundamental frequency), Dual setting Number of starts allowed, Torque control, Water hammer surge control stop	
Input Signals	2 analogue inputs, 0-20mA or 4-20mA, 0-10V 5 configurable digital inputs 1 PTC input	
Output Signals	1 analogue output 0-20mA or 4-20mA 3 changeover output relays (250VAC, 10A non inductive)	
Display Information	Phase current, Supply voltage, Relays status, Digital inputs / PTC status, Analogue inputs value, Analogue output value, Overload status, Motor supply frequency, Motor power factor, Developed power, Motor shaft torque, Fault history (5 most recent faults)	
LED's Indications	LED1 (green) : Voltage present on control board	
	LED2 (orange) : <b>Blinking</b> , Motor accelerating / decelerating <b>On</b> , motor running	
	LED3 (red): Fault present	

\*note 2) For additional information consult the technical manual

## Softstarter applications

According to this information, there are two utilisation categories for the Electronics Softstarter, described as follow :

- 1) Starting Time
- 2) Starting Current
- 3) Ambient Temperature
- 4) Time at OFF status
- 5) Number of Startings per Hour

### EXAMPLE

1 90 : 2 AC53b 3 4.5 - 4 30 : 5 330

- 1 Rated Current of the Softstarter under the described conditions : In, (90 Amps)
- 2 The thyristors will be bypassed
- 3 Starting Current, as multiple of the nominal current (In), that means : 4.5 × In

- 4 Starting Time, in seconds, (30s)
- 5 Seconds between the end of starting and the beginning of next starting (10 startings per hour)

## Common Applications

**Example :** The application is: Fan(fresh Air), 400V, 55kW motor

Look at 400VAC table right column [AC53b 4.5-30:330] 55kW means the softstarter coded SS7011B with nominal current of 110A

COMMON APPLICATIONS	CHARACTERISTIC STARTING CURRENT
<b>WATER AND WASTEWATER</b>	
Centrifugal Pumps	3.0 × In
Mono and High Pressure Pumps	4.0 × In
Multistage Pumps	4.0 × In
Vertical Pumps	3.0 × In
Split Chamber Pumps	3.5 × In
Submersible Pumps	3.5 × In
<b>VENTILATION</b>	
Fans (extraction)	3.5 × In
Fans (fresh air)	4.5 × In
Condensor Fans	3.5 × In
Climatization Turbine	4.5 × In
<b>PULP AND PAPER INDUSTRY</b>

Pulp Machines	4.5 × In
Trommels	4.0 × In
Pulp Mixers	4.0 × In
Filters	4.0 × In
<b>METALS, AGGREGATES AND MINERALS</b>	
Dust Filters Fans	3.5 × In
Conveyor Belts	4.5 × In
Crushers	3.0 × In
Hammer Mills	4.5 × In

COMMON APPLICATIONS	CHARACTERISTIC STARTING CURRENT
Jaw Crushers	4.0 × In
Rotor Bar Mills	4.5 × In
Ball Mills	4.5 × In
Secondary Mills and Sand Pulverizers	3.5 × In
Eccentric Feeder	4.5 × In
Trommels	4.0 × In
Vibrators	4.0 × In
Separators	4.0 × In
Feeders	3.5 × In
<b>FOOD INDUSTRY</b>	
Air Compressors	4.0 × In
Sorters	3.5 × In
Bottle Wash Machines	3.0 × In
Driers	4.5 × In
Centrifuges	4.0 × In
Crushers, Punchers	4.5 × In
Palletizers	4.5 × In
Separators	4.5 × In
Cutters	3.0 × In
Material Handling	3.5 × In
<b>TOOLING MACHINES</b>	
Arm Saws	4.5 × In
Buzz Saws	3.5 × In
Stamping presses	4.5 × In
Crumbing Machines	3.5 × In

COMMON APPLICATIONS	CHARACTERISTIC STARTING CURRENT
Chamfering Tools	3.5 × In
Flatters	3.5 × In
Sanding Machines	4.0 × In
Lathes	4.5 × In
Crusher Machines	3.5 × In
Palletizers	4.5 × In
Presses	4.0 × In
Turn Tables	4.0 × In
Transporters	4.0 × In
<b>PETRO-CHEMICAL</b>	
Centrifugal Machines	4.0 × In
Screw Pumps	4.0 × In
Gas Pumps (Propane, butane)	3.0 × In
Crude Oil Extraction Pumps	4.5 × In
Crude Oil Transfer Pumps	4.5 × In
Hydrocarbon Transfer Pumps (liquid Stage)	3.5 × In
Transport and Packaging	3.5 × In
Conveyors	3.5 × In
<b>GENERAL</b>	
Hydraulic Equipment	3.5 × In
Agitators	4.0 × In
Compressors (Screw compressor, without load)	3.0 × In
Compressors (Reciprocating compressor, without load)	4.0 × In
Conveyors	4.0 × In
Mixers	4.5 × In

**Safety Instructions**

- For your safety, please read user's manual thoroughly before operating.
- Contact the nearest authorized service facility for examination, repair, or adjustment.
- Please contact qualified service technician when you need maintenance.  
Do not disassemble or repair by yourself!
- Any maintenance and inspection shall be performed by the personnel having expertise concerned.
